

PRESS RELEASE 07/2008

Munich visualisation specialist Realtime Technology is to provide Eurocopter Deutschland GmbH with support in the field of exterior design.

Virtual Air Tour – Eurocopter and RTT Enter into a Partnership

Munich, 19 June 2008 – Eurocopter Deutschland GmbH, the global market leader for civil helicopters, has decided to collaborate with Realtime Technology AG (RTT). RTT will use the creative ideas of its people and its market-leading RTT DeltaGen visualisation software suite to visualise the latest helicopter models in real time in class-leading visual quality. RTT is to begin providing support to Eurocopter at its facilities in Donauwörth, Germany with immediate effect.

“We are looking forward to this alliance. We can use RTT’s realtime visualisation technology to provide our customers with even greater levels of innovative and individual service and advice”, comments Friedrich Pitschl, Vice President of Eurocopter Deutschland, Operations & Business Improvement Commercial Helicopters.

Helicopter customers have particularly high demands and expectations. In addition to a range of special technical features, the characteristics they look for in a helicopter are lightweight construction, fracture resistance, maximum visibility and an appealing design. Collaborating with RTT will allow Eurocopter to address customers in a unique way. RTT will work closely together with Eurocopter to produce company-specific and individual solutions that can be used to display the latest helicopter models in spectacular, photorealistic quality. Content will be processed using RTT DeltaGen, a software solution that has become the standard tool for high-end 3D visualisation around the globe.

“We are proud that Eurocopter decided to go with us,” states Ludwig A. Fuchs, co-founder and board member of RTT AG. “With Eurocopter, we have acquired a market leader in the aviation sector as a customer. This proves to us that our solutions and services are global leaders in the sphere of 3D realtime visualisation technology, and we will take this with us in continuing the extremely positive development of our company”.
