

**PRESS RELEASE 12/2008**

## **Virtual Reality for Improved Car Ergonomics – Human Solutions and RTT Conclude a Cooperation Agreement**

**Kaiserslautern/Munich, September 10, 2008 – Human Solutions GmbH and Realtime Technology AG (RTT) have concluded a cooperation agreement for the integration of RAMSIS into the high-end visualisation software "RTT DeltaGen". The objective of the agreement is the virtual execution of ergonomics analyses, workplace analyses and product presentations for vehicles and aircraft. RAMSIS will also be used in RTT DeltaGen for other areas of virtual prototyping.**

"In the era of globalisation, the reduction of product development time and costs is an important objective for the automotive and aircraft industries. VR systems still offer lot of potential here because errors – and consequently resulting into expensive prototype development costs – can be drastically cut with the help of such systems. With RAMSIS incorporated in RTT DeltaGen, we want to use 'Virtual Reality' to provide a realistic display of human beings and motion analyses", says Andreas Seidl, Managing Director of Human Solutions GmbH.

RTT develops 3D visualisations for design, development, marketing and sales; and with RTT DeltaGen, it provides a software that offers realistic depictions in the field of ergonomics analysis. "We believe that this cooperation with Human Solutions is strategically important for the further development of our product range – one that will enable us to meet the requirements of our customers even more effectively", comments Ludwig A. Fuchs, co-founder and member of the board of RTT AG.

As an RTT DeltaGen module, RAMSIS will, in future, be distributed by RTT. A corresponding RAMSIS license will nonetheless be required to make use of the technology.

### **About RTT AG**

The Realtime Technology AG is one of the worldwide leading suppliers of 3D realtime visualization technologies. The company also provides services for industrial applications in the automotive, aviation, consumer goods and interior design sectors. RTT flanks its customers with virtual visualization support during the design and development phase of the various product concepts (virtual prototyping) and during the marketing and sales phase for the presentation of products in all their variations, for additional options in the showroom, on the Internet, at Exhibitions and at the point of sale (virtual marketing).

RTT's customer list includes names like Adidas, Airbus, Applus Airon Technic, Audi, BASF, BMW, Chrysler, DaimlerChrysler, Dodge, EADS, Fiat, Ferrari, Ford, General Motors, Honda, ICON Aircraft, Iveco, Jeep, Lamborghini, Lexus, Magna Steyr, Maserati, Maybach, Mazda, Mercedes, Miele, Mitsubishi Electric, Opel, Porsche, PSA, Rolls-Royce, Samsung, Scania, Schüco, Skoda, Sony Ericsson, Steelcase, Suzuki, Thyssen Krupp, Toyota, Volkswagen and Volvo. RTT currently has 340 employees at twelve sites. The company has its head offices in Munich.

RTT is a public company traded on Open-Market Frankfurt, Xetra, Freiverkehr Stuttgart and Freiverkehr Berlin-Bremen: R1T, ISIN: DE0007012205. For further information, please refer to [www.rtt.ag](http://www.rtt.ag)

### Human Solutions GmbH

Human Solutions GmbH is a global software and system house with around 70 employees in Kaiserslautern, Germany and Detroit, USA. The company develops and sells hardware and software solutions for body scanning, ergonomics and simulation applications. Human Solution's current customer list contains more than 300 names - these include well-known companies like Daimler, BMW, Volkswagen, Airbus Industries and the US and Swiss Armies, plus retailers like the chain stores Karstadt and Kaufhof, fashion houses like Hirmer und Engelhorn, apparel manufacturers such as Odermark, Scabal, van Laack and many, many more.
