

PRESS RELEASE 15/2009

RTT Software and Teamcenter to be connected by a joint interface

RTT Partners with Siemens PLM Software to Enable Creation of Highly Realistic 3D Images from PLM Data

Munich, December 02, 2009 – Realtime Technology (RTT) AG today announced a partnership with Siemens PLM Software, a business unit of the Siemens Industry Automation Division and a leading global provider of product lifecycle management (PLM) software and services. RTT joins the *Siemens Solution Partner Program* as a software and technology partner in order to provide greater integration between components of the two companies' cutting-edge software solutions. Both providers are cooperating closely to develop an interface that links RTT DeltaGen to Teamcenter®, Siemens' flagship PLM portfolio software, via RTT PictureBook. The integration of RTT's real-time visualisation technology with the world's most commonly used product data management platform will enable companies to automate extensive process steps for creating high-end 3D renderings and virtual reality models, thereby boosting the efficiency of both product development and marketing.

High-end 3D visualisation plays a key role throughout product lifecycles, from the development and marketing of new products to product management. Digital product models, known as virtual prototypes, are used to create highly realistic, three-dimensional images that facilitate efficient communication in all phases of a product's lifecycle. A significant benefit of the integration between Siemens PLM Software and RTT is the use of automated *feeds* to accelerate the creation process for these 3D images, thereby tremendously reducing the manual work required. Another is the integration of important background information about both models and projects, such as product structure, costs, vendors, change loops, etc.

"Together with RTT, we are making it possible for our customers to digitally manage their product lifecycles even more consistently than before," comments Rich Ramsey, Vice President of Partner and Components Marketing, Siemens PLM Software. "The seamless integration of the visualisation process is an important enhancement which will help our customers to optimally exploit the full potential of their 3D models and data."

Ludwig A. Fuchs, co-founder and board member of RTT, is delighted about the gain in functionality, "The integration of our software with Teamcenter generates huge benefits for our customers with minimal increases in complexity. It supports our core development goal, which is to improve the flexibility, efficiency and productivity of the entire product lifecycle."

About RTT AG

RTT provides 3D real-time visualisation technology and services for innovative workflows in the automotive, aerospace and consumer goods industries as well as in the fields of interior design and architecture. It supports customers in coming up with new ways of how to design and to market their products.

Among RTT's customers, one can find Adidas, Agusta, Airbus, Applus Airon Technic, Audi, BASF, Bertrandt, BMW, Bosch, Carbon Motors Corporation, Changchun Railway, China Faw Group Corporation, Chrysler, Dai Nippon Printing (DNP), Daimler, Demag-ergothech, Dodge, EADS, EDAG, Faurencia, Fiat, Ferrari, Ford, General Motors, Hakuhodo, Harley-Davidson, Hawker Beechcraft, Holden, Honda, ICON Aircraft, Inovo Design, Italdesign Giugiaro, Iveco, Jialing Motor, Jeep, Johnson Controls, Lamborghini, Lexus, Magna Steyr, Maserati, Maybach, Mazda, Mercedes, Miele, Mitsubishi Electric, Opel, PATAC, Porsche, PSA, Rolls-Royce, Saab, Sagem, Samsung, Scania, Siemens VDO, Schüco, Serco, Skoda, Sony Ericsson, Steelcase, Suzuki, TERREX, Tesco, Thyssen Krupp, Toppan Printing, Toyota, UCHIDA YOKO, Vauxhall, Volkswagen and Volvo.

The supplier of 3D real-time visualisation solutions looks back on a remarkable development with average annual growth rates of 50 per cent over the past few years. RTT currently employs about 350 people at 14 locations. The company is based in Munich. Further offices are located in Los Angeles, Detroit, Seoul, Tokyo, Shanghai, Paris, Brussels, Milan, Valencia, Melbourne, Singapore, Stuttgart and Hamburg.

RTT is a public company traded on Open-Market Frankfurt, Xetra, Freiverkehr Stuttgart and Freiverkehr Berlin-Bremen: R1T, ISIN: DE0007012205. For further information, please visit www.rtt.ag
